Conclusion: To the extent verified, in the environment provided to us, the Site appears to be free from OWASP Top 10 Vulnerabilities and other known vulnerabilities and appears to be safe for hosting.

The assessment was carried out and it is based on the application contents provided to us during the audit and the detailed reports were already submitted. Application may be subjected to risk and the validity of our conclusions may alter in the future, if changes made to the application. The Assessment is carried out to identify vulnerabilities if any, it doesn't assure absence of vulnerabilities. With the view of constantly changing threat landscape and attack vectors and emergence of new vulnerabilities, no application can be 100% secure despite conducting security/penetration testing. Y&R LLP nor its employees shall at no point be liable for any loss or damage arising from reliance on this report.
